

Turbine Problem Scenario

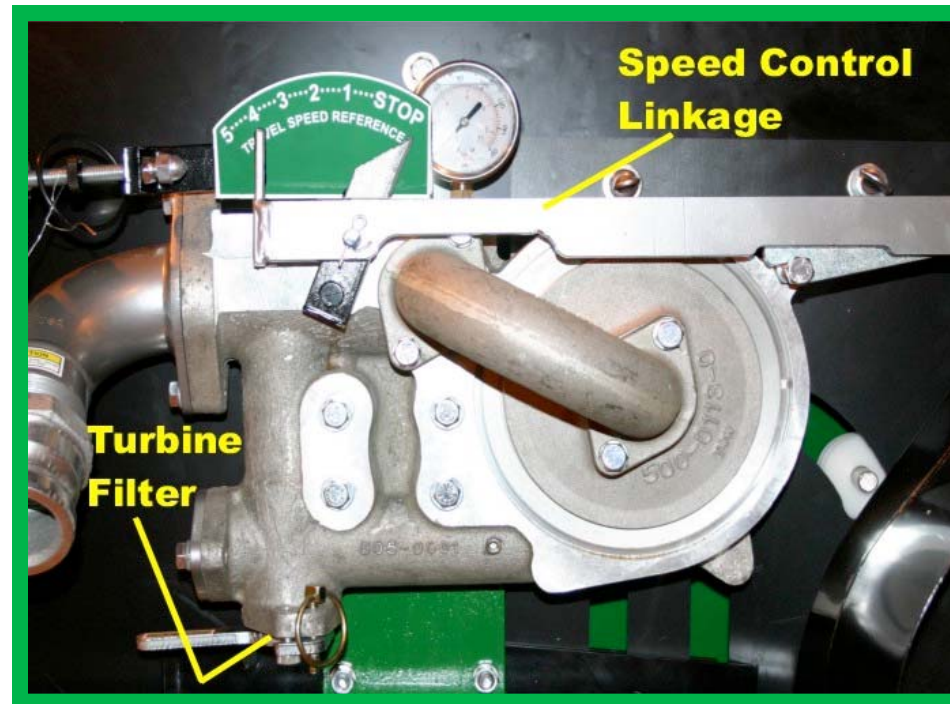

Problem:

Turbine will not run

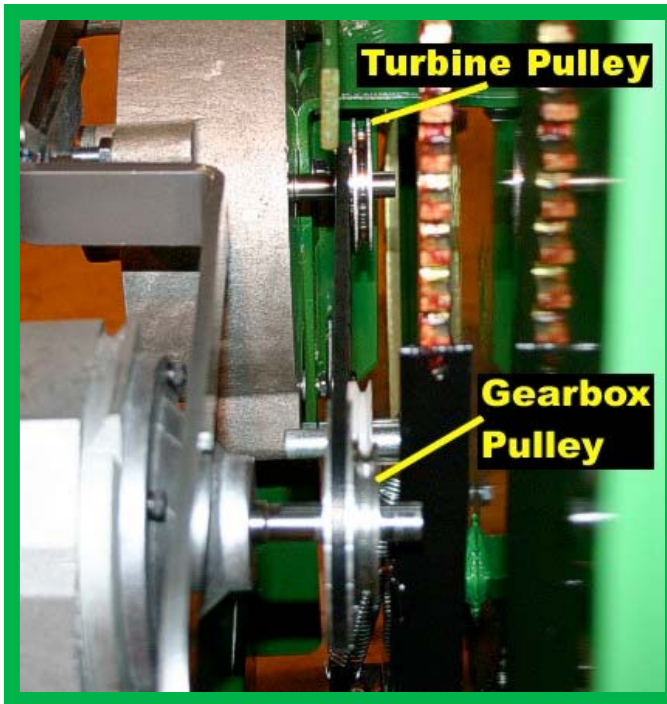

Turbine Problem Solutions

- Check that the Speed Control Linkage is working properly
- Check Turbine Filter for debris

Turbine Problem Solutions

- If you are trying to run the machine on a slower setting; make sure the drive belt on the turbine is on the smaller pulley and on the larger pulley on the gearbox.

Turbine Problem Solutions

- With water supply OFF; check to see if the turbine pulley spins freely by hand.
- Check to see if the sprinkler is operating correctly. Is the correct nozzle size being used?
